Dear Hiring Manager,

Lenovo's promise of 'Smarter Technology for All' only lands if the marketing behind it is as fluent in Madrid as it is in Dubai — and that dual fluency across Europe and META is exactly where I operate. The Europe and META Visual Marketing Manager role caught my attention because it asks for something I do every week: lead integrated marketing across two very different regions at once, aligning global strategy with genuine local relevance. As a marketer who grew up professionally in Madrid and is now based in Dubai, I would relish helping the Visuals business grow across both.

As Brand & Marketing Manager at DoFreeze, I lead integrated marketing strategy and campaign execution across 50+ markets spanning Europe, META and Asia — owning end-to-end campaign planning, media strategy and the A&P / marketing-investment budget, and steering spend against ROI and ROAS for both Consumer and Commercial audiences. I work across a matrix of Sales, Business Units, Finance, PR, media and agency partners to keep marketing aligned with business priorities. Earlier, at Alibaba's Miravia, I grew 42 accounts by +30% GMV QoQ through campaign-led planning inside a 100,000-person organisation, and I sharpened my performance discipline at Mondelez — so budget management, media planning and ROI measurement are second nature.

Two things set me apart for this role. First, your brief calls for adapting and localizing global content 'leveraging AI-enabled solutions' — I have already built exactly that: a generative-AI content system (Claude / GPT) that localizes campaigns at scale across 50+ markets and cut manual workload by ~40%, which is precisely how a lean EMEA team turns global assets into local relevance fast. Second, I offer genuine Europe + META reach in a single hire: a Spanish national, bilingual (English C1), already in Dubai on a residence visa — no relocation and no ramp-up on either region. I'll be candid that my background is FMCG, beauty and e-commerce rather than tech hardware; what I bring is category-agnostic regional-marketing rigor and a fresh consumer lens that travels across products — and I ramp fast.

I would be excited to bring this blend of multi-market execution, budget and media discipline, and AI-enabled localization to Lenovo's Visuals business across Europe and META. I am available to start immediately and would welcome the chance to discuss how I would approach your quarterly planning and country-marketing cadence. Thank you for your consideration — I look forward to hearing from you.

Best regards,

Paula De Francisco Pérez
