

20 August 2026

Dear Hiring Manager,

Your posting is refreshingly specific: you want a marketer who actively uses AI to drive performance, not a traditional digital or SEO hire. That is exactly how I work. At DoFreeze I built an AI-powered automation system on Claude and generative AI that runs campaign planning, content, market research and KPI reporting — cutting manual workload by around 40% — while I manage paid performance on Meta and Google Ads day to day.

On the performance side, I plan and optimise Meta Ads (Facebook & Instagram) and Google Ads end-to-end — audience building and retargeting, structured A/B testing across creative and copy, budget and spend allocation, and ROI/ROAS optimisation — and I own a Shopify store I improve for conversion rate (CRO), so I'm accountable for leads and revenue, not impressions. Earlier, at Alibaba's Miravia, I analysed ROI, ROAS, conversion and retention across 42 accounts to grow GMV +30% QoQ, so data-led decision-making and dashboard reporting (CTR, CPA, ROAS) are second nature.

I'll be straightforward about scope: my deepest craft is AI-powered marketing and paid performance rather than years of technical SEO tooling (SEMrush/Ahrefs, schema, Core Web Vitals). But because I work inside LLMs every day, the GEO and AEO shift — structuring content so a brand surfaces in ChatGPT, Perplexity and Google's AI Overviews — is intuitive territory for me, and I ramp fast on new tools. I'm Google Digital Marketing & E-Commerce certified, already based in Dubai on a UAE residence visa, and can move quickly.

I'd welcome the chance to show how I'd combine AI workflows with paid performance to generate qualified leads for SMS Realty — and how I'd approach the SEO/AEO/GEO build-out with an AI-first lens. Thank you for considering my application; I'd be glad to walk through a first-90-days plan.

Best regards,

Paula De Francisco Pérez
