Dear Hiring Manager,

iHerb's mission to make healthy living easy and accessible — everywhere, in every market — is exactly the kind of e-commerce challenge I like, so the Growth Marketing Specialist, MEA role caught my eye. Executing and optimising paid media across Middle East & Africa markets is close to my day-to-day: at DoFreeze I plan, launch and optimise Meta and Google Ads campaigns across GCC, MENA and Africa, so running performance campaigns market-by-market across this exact footprint is already what I do.

As Brand & Marketing Manager at DoFreeze, I own paid media execution end-to-end — campaign setup, QA, launch, budget pacing and optimisation on Meta Ads (Facebook & Instagram) and Google Ads — building audience targeting, bidding and creative rotations, keeping UTM tracking and naming conventions clean, and monitoring CAC, ROAS, conversion rate and CTR/CPC/CPM daily to catch pacing, delivery and creative-fatigue issues early. I run structured A/B and creative tests and coordinate performance creative with design and localisation across languages and markets. Earlier, at Alibaba's Miravia, I analysed ROI, ROAS, conversion and retention across 42 accounts to grow GMV +30% QoQ — so the detail-heavy, data-driven side of campaign operations is second nature.

A few things I'd bring beyond the checklist: I'm already based in Dubai on the MEA time zone and available immediately, I own an e-commerce Shopify store and its conversion rate (CRO) so I optimise the full journey from paid click to purchase, and I'm an early adopter of generative AI (Claude/GPT) with automation that scales campaign planning, creative and reporting — genuinely useful for testing roadmaps and recurring readouts. I'll be straightforward about two things: this is a specialist, execution-focused seat and I currently sit at Manager level, so I'm applying because the hands-on paid-media craft is what I most enjoy; and while I work across Arabic-speaking MENA markets and coordinate localisation, my own fluency is English (C1) and Spanish (native).

I'd welcome the chance to show how I'd set up, QA, launch and optimise MEA campaigns for iHerb — from audience and bidding structures through creative testing and budget pacing to the clean tracking and reporting that keep ROAS and CAC honest. I'm fluent in English, based in Dubai and available to start quickly. Thank you for considering my application — I'd be glad to walk through how I'd approach a first 90 days of MEA paid media.

Best regards,

Paula De Francisco Pérez
