Dear Hiring Manager,

TikTok turned Retail & E-commerce advertising into full-funnel performance — creator-led, measured on real sales — and that is precisely where I work every week. The Client Solutions Manager role sits at an intersection I know from three sides: running performance campaigns hands-on on the self-serve auction, growing e-commerce advertisers as a consultative partner through business reviews and optimisation, and pairing paid with the creator-led social that is TikTok's native craft. I'd bring all three.

I'm a hands-on performance practitioner. At DoFreeze I plan, launch and optimise campaigns on Meta Ads (Facebook & Instagram) and Google Ads — building audiences, A/B-testing creative, setting up pixel-based conversion tracking and Google Analytics, and reading ROI/ROAS against sales goals across 50+ GCC/MENA markets. And my home turf is Retail & E-commerce: at Alibaba's Miravia I managed 42 key accounts to +30% GMV QoQ as a consultative advisor while owning the Flash Sales P&L reporting to the CEO; I run a Shopify store end-to-end (CRO); and I onboard brands across UAE quick-commerce (Noon, Talabat, Careem, Deliveroo). That is exactly the advertiser world — marketplaces, beauty, fashion, quick commerce — this vertical serves.

On the post-sale motion the role is built on, I grow client relationships through regular strategic business reviews, optimisation and product adoption, and I run creator-led social at scale (25–50 creators per campaign) — TikTok-Shop-adjacent commerce. I'm also AI-native, building tooling that makes campaign planning, analysis and reporting faster. I'll be candid about one genuine gap: my measurement depth is on the web side (Meta Pixel, Google Analytics, funnel and conversion analysis) rather than app MMPs like Appsflyer or Adjust — but tracking logic is tracking logic, I ramp fast on new tooling, and I'd close that gap quickly. The core this role rewards — hands-on campaign management, optimisation and A/B testing, consultative account growth and Retail & E-commerce fluency — is exactly what I do.

I'd love to walk the team through how I'd build and optimise a full-funnel plan for a Retail & E-commerce advertiser on TikTok — from measurement setup to the business review. I'm bilingual (Spanish native / English C1), based in Dubai and available immediately. Thank you for considering my application.

Best regards,

Paula De Francisco Pérez
