

Revolut — UAE Brand & Growth

A full-funnel launch blueprint to make Revolut the way the UAE moves money

Prepared by Paula De Francisco Pérez · 20 August 2026 · For: Marketing Manager (Brand) — Dubai / UAE, Revolut

Purpose. This is how I would land in the role: a fast read of the UAE customer and competitive set, one ownable brand idea (“No Borders”), a full-funnel channel architecture from acquisition to retention, and the experimentation and KPI discipline to prove it — built to run with global Growth and regional leadership from week one.

1 • Market & customer insight (UAE)

- **Expat-first market:** ~88% of residents are expats and the UAE is one of the world's largest remittance hubs — money here is inherently cross-border, high-frequency and emotionally loaded (it's family, not just FX).
- **The pain is real:** the world's average remittance still costs ~6% and can take days; much is still sent as cash through exchange houses. Revolut's instant, real-rate, multi-currency product is the answer — the job is brand salience and trust at the moment of sending.
- **Competitive set:** exchange houses (Al Ansari, LuLu), money-transfer apps (Wise, Remitly), neobanks (Wio, Mashreq Neo) and traditional banks. Revolut wins on rate transparency, speed and everyday multi-currency utility — that must be the story.
- **Two jobs, one brand:** the value-conscious remitter (India, Philippines, Egypt, Pakistan) and the premium multi-currency traveller (UK/EU expats) — one idea, tuned by corridor and life-stage.

2 • Positioning & brand platform

Positioning: Revolut = money with **no borders**. The one defensible, locally-true idea — instant, real-rate, multi-currency money that never stops at the border — dramatised as how the UAE actually lives and sends.

Tone of voice: clear, confident, human; never preachy about money. Own a local tone-of-voice and style guide, and adapt global campaigns to genuine UAE nuance (language, corridors, cultural moments) rather than lifting them wholesale.

3 • Full-funnel channel architecture

FUNNEL STAGE	OBJECTIVE	CHANNELS & MECHANICS
Awareness	Own the corridor & the idea	Corridor-cut OOH (Sheikh Zayed Rd, Metro), community micro-creators, PR & earned around the “No Borders” idea
Consideration	Build trust, expose the rate	Data-driven “real cost” content, comparison stories, ASO & organic social, always-on search
Conversion	Drive the first transfer	Paid social (Meta/TikTok), app-install (ASA/UAC), payday-week zero-fee first-send offer, localised onboarding
Retention	One transfer → everyday money	Lifecycle CRM/EDM & push to multi-currency spend, savings vaults & travel; community referral loop

4 • 90-day launch calendar

WINDOW	ACTIVATION	CHANNEL	OBJECTIVE
Wk 1-2	Launch "No Borders" — idea & hero assets	OOH + social + PR	Salience & corridor awareness
Wk 3-6	Corridor creators + rate-exposed content	Meta / TikTok / YouTube	Consideration & trust
Payday weeks	Zero-fee first-transfer push	In-app + paid social	First-transfer activation
Month 3	Lifecycle + referral loop; scale winners	CRM + referral	Retention & compounding growth

Anchored to real UAE moments: monthly payday cadence (salaries land ~25th), Ramadan & Eid (family & giving), summer travel (multi-currency), and DSF/DSS retail peaks.

5 • Experimentation & growth mechanics

- **First-transfer offer:** the single activation metric; test offer type, threshold and payday timing to find the most efficient trigger.
- **Creative testing:** structured A/B on hook, corridor message and creator format; scale on ROAS and cost-per-first-transfer, kill the rest fast.
- **Referral loop:** engineered around how these communities actually share — a low-CAC, compounding growth engine measured by K-factor.
- **Playbook operationalisation:** winning creative, audiences and mechanics packaged into a regional playbook so the idea scales to other markets without re-inventing it — my AI-automation background makes this fast and repeatable.

6 • KPIs, funnel economics & cadence

KPI	WHAT IT PROVES	CADENCE
Install → first-transfer activation rate	Hero KPI — the concept works	Weekly
Blended CAC in target corridors	Efficient, corridor-led acquisition	Weekly
Multi-currency MAU & retention	One transfer becomes an everyday habit	Monthly
Referral K-factor	The corridor loop compounding	Monthly
Creative ROAS & test win-rate	Experimentation discipline & spend efficiency	Per flight
Brand salience / prompted awareness (UAE)	Brand-building, not just performance	Quarterly

Cadence: weekly growth stand-ups on activation & CAC with the global Growth team; monthly brand & funnel review with regional leadership; quarterly brand-tracking and playbook updates.

Why I can land this fast: I lead brand & growth in the UAE today, came up inside hyper-growth global tech (Alibaba's Miravia — 42 accounts, +30% GMV QoQ; Glovo), run go-to-market launches and full-funnel paid media end-to-end, and built an AI marketing-automation system that scales repeatable playbooks across 50+ markets. "No Borders" is the way I'd put that to work for Revolut in the UAE.
