

21 August 2026

Dear Hiring Manager,

A role working directly with the CEO to build brands, generate leads and drive measurable growth across multiple ventures — where the brief is explicitly to implement AI tools, automations and modern marketing technology, not to manage social feeds — is exactly the kind of ownership I'm looking for. I'm a commercially minded brand and growth marketer who already runs marketing across multiple brands and 50+ markets from Dubai, and being AI-first isn't a buzzword for me: I built the automation that makes a lean marketing function move like a much bigger one.

Your responsibilities map onto what I do every day. At DoFreeze I develop and execute brand and marketing strategy across several brands, design multi-channel campaigns (Meta and Google paid media, e-commerce, influencer, social, EDM) built to drive profitable sales, own the digital presence end-to-end, and analyse ROI, conversion and customer behaviour to improve results — coordinating agencies, freelancers and vendors and running multiple projects at once. The AI ask is my sharpest edge: I built a marketing-automation system on Claude / generative AI that turns research, content, campaign planning, reporting and decks/landing pages into repeatable workflows and cut manual workload ~40%. And I'm comfortable at the top table — at Alibaba's Miravia I owned the Flash Sales channel reporting directly to the CEO and grew 42 accounts +30% GMV QoQ, presenting plans and performance to leadership.

A few honest notes so you can calibrate. My sector background is e-commerce, FMCG, beauty and fashion rather than SaaS, blockchain or IT infrastructure — but I'm AI-native and own e-commerce/Shopify and martech day to day, so the digital and software-adjacent terrain is familiar, and I ramp fast on new categories. My marketing and commercial career runs from 2021 across Mondelez, Glovo, Miravia and DoFreeze — around five years, inside a hyper-growth startup (Glovo) and reputed global brands (Alibaba's Miravia, Mondelez), which is the pedigree your brief asks for. I'm EU-market native (Spanish, career built in Madrid), work independently with minimal supervision, and turn ideas into execution — exactly the resourceful, self-directed operator this role needs.

I'd welcome the chance to show, not just tell: I can share campaign case studies, the AI-automation system I built and examples of measurable results (from +30% GMV QoQ to launch and content work). I'm based in Dubai and available to talk through how I'd approach brand and growth across your ventures in the first 90 days. Thank you for your consideration — I look forward to hearing from you.

Best regards,

Paula De Francisco Pérez
