PROFESSIONAL SUMMARY

eCommerce specialist with 4+ years across Shopify, marketplaces and quick-commerce — comfortable owning a store end-to-end and, without being a pure developer, getting into the code for small adjustments. Currently own DoFreeze's Shopify store end-to-end: implementation, theme configuration and customisation (theme editor, sections, light HTML/CSS, basic Liquid), apps & modules, collections, discounts, checkout and UX — lifting conversion and AOV through data-led CRO. Configure the commercial setup (payments, shipping, taxes, discounts) and coordinate technical connections between the store and third-party tools (logistics, quick-commerce platforms, CRM/ERP), and implement base eCommerce tracking (Meta Pixel, Google Ads conversion tracking, GA4). Deep marketplace ecosystem background — Key Account Manager at Miravia (Alibaba), one of the marketplaces named for this role — plus quick-commerce (Noon, Talabat, Careem, Deliveroo, Glovo) and hands-on Paid Media (Meta Ads, Google Ads). Early adopter of generative AI (Claude/GPT) for automation and analytics — a strong fit for Flat 101's AI-first way of working. Google E-Commerce & Digital Marketing certified; CUNEF BBA specialised in E-Commerce & Fashion. Spanish national with full right to work in Spain / the EU, English C1, happy working remote, hybrid or on-site.

Brand & Marketing Manager (Shopify & eCommerce — End-to-End)

Oct 2025 – Present

DoFreeze LLC · Global FMCG / D2C distributor | Brands: Befit, Eurocake, Flair | 50+ countries · Dubai, UAE

- Own the D2C Shopify store end-to-end — implementation, theme configuration and customisation (theme editor, sections, settings, light HTML/CSS edits and basic Liquid/templating logic), activation and management of apps & modules, collections, discounts, checkout and UX — running the store as a single point of ownership from setup through growth
- Configure the store's commercial setup end-to-end (payment methods, shipping rules, taxes, discounts and checkout) and coordinate the technical connection between the store and third-party tools — logistics, quick-commerce platforms and CRM/ERP systems (Salesforce, SAP)
- Implement base eCommerce tracking and measurement — Meta Pixel, Google Ads conversion tracking and GA4 eCommerce analytics — to attribute performance and steer optimisation
- Lift conversion rate (CRO) and average order value through data-led merchandising, funnel and UX optimisation and A/B testing
- Plan and optimise Paid Media on Meta Ads and Google Ads (audience building, creative A/B testing, retargeting) to drive qualified traffic and sales, analysing ROI/ROAS
- Built an AI-powered (Claude/GPT) automation layer for content, campaign planning, analytics and reporting — cutting manual workload ~40% — directly aligned with Flat 101's AI-first way of working
