PROFESSIONAL SUMMARY

Hands-on e-commerce operator with 4+ years running the operational side of fast-growing e-commerce and FMCG businesses. At DoFreeze I own the Shopify store end-to-end — catalogue, product information, stock, pricing, promotions and checkout — and integrated brands into UAE quick-commerce platforms (Noon, Talabat, Careem, Deliveroo), coordinating onboarding, listings, promo mechanics and retail execution. I build systems rather than maintain them: I designed an AI-powered automation system (Claude/GPT) that documents and scales planning, content, research and reporting, cutting manual workload ~40%. Across Glovo and Alibaba's Miravia I coordinated cross-functional operations (logistics, support, marketing, commercial) in high-growth, fast-moving environments, juggling many priorities with high autonomy and a strong ownership mentality — identifying bottlenecks and driving solutions through to execution. I'll be clear that my core has been marketing/commercial and e-commerce rather than a dedicated operations title; the operational craft — systems, SOPs, coordination and problem-solving — is what I do every day. Excellent communication (English C1), fully set up for autonomous remote work.
