

19 June 2026

Dear Hiring Manager,

Justlife's bet — that the next 15 million sessions come from AI-enabled performance systems, not more of the same — is exactly how I work. I build generative-AI automation into marketing and run paid media hands-on, so co-owning growth across UAE and KSA is a role I'd be genuinely excited about.

I'm an operator, not a deck-from-a-distance strategist. At DoFreeze I built an AI-powered marketing automation system (Claude) that cut manual workload ~40%, and I personally run Meta and Google Ads — audience building, creative A/B testing — analysing ROI and ROAS to improve performance. I also own a Shopify store end-to-end, lifting conversion and AOV through data-led merchandising.

On the marketplace side, I grew 42 accounts +30% GMV QoQ at Alibaba's Miravia and drove GMV on Glovo's quick-commerce platform, so I understand install-to-repeat and marketplace economics. I'm candid that formal incrementality testing (geo/holdout) is where I'd ramp fastest — but the analytical instinct and AI-in-production track record are already there. I'm Dubai-based on a residence visa and bilingual.

I'd welcome a conversation about co-owning Justlife's growth engine. I'm available to interview at your convenience and can start immediately. Thank you for your consideration.

Best regards,

Paula De Francisco Pérez
