

22 June 2026

Dear Hiring Manager,

Your search for a Marketing Manager who pairs creative strategy with real AI fluency is exactly the profile I have spent the last year building. At DoFreeze I designed a generative-AI marketing system (Claude/GPT) that now powers our content, campaign planning and reporting — the kind of AI-driven workflow OVO Signature is looking to embed.

Across DoFreeze and Alibaba's Miravia I have run exactly the levers in your brief: Meta and Google Ads, SEO, email and social campaigns, influencer collaborations and full-funnel customer acquisition. The results are concrete — +30% GMV QoQ across 42 key accounts, an influencer programme scaled from zero to 25–50 creators per campaign, and 6 NPD launches taken end-to-end across 50+ markets.

What sets me apart for a growing fashion and creative company is the combination of e-commerce depth (Shopify store ownership, CRO, UAE marketplaces) with everyday use of AI tools — ChatGPT, Claude, Canva AI and automation/CRM workflows — to make a lean team move faster. I'm Dubai-based with a UAE residence visa, so there's no relocation or sponsorship to arrange.

I would love to show you the AI automation I have built and how it would translate to OVO Signature's brand growth. I'm available to talk this week and can share live examples of campaigns and content. Thank you for considering my application.

Best regards,

Paula De Francisco Pérez
